Also added in this enhancement is our new "Standard Delivery" option. See pages 8 and 9 for details.

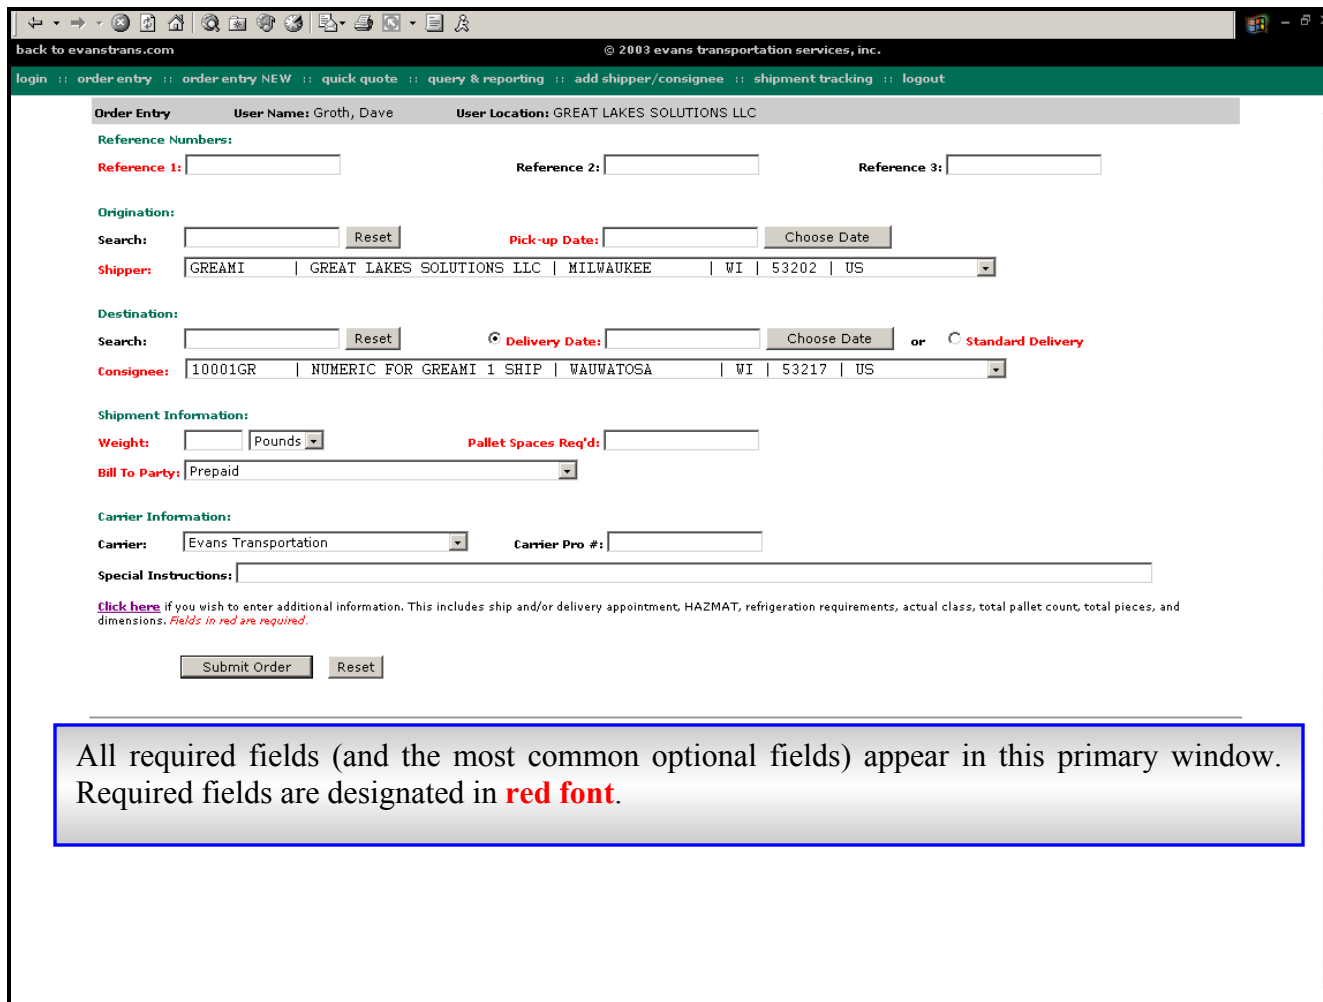

A new Internet Order Entry screen has been developed so that the user may enter all required fields (and the most common optional fields) without any vertical or horizontal scrolling. **Screen resolution 1024 X 768, or greater is required.**

This has been accomplished by rearranging the input fields on the new primary window, and then by offering a secondary window (pop-up) that allows for the entry of additional, optional information.

The original method of Order Entry will be also retained.
